

Dependence on HEOR: **5** decisive, **4** strong, **3** partial, **2** marginal, **1** peripheral

Domain 1: Social value

| | |
|---|---|
| 1.1 Carbon emissions reduction | 2 |
| 1.2 Packaging reduction | 1 |
| 1.3 Product usage and disposal guidance | 1 |
| 1.4 Modern slavery risk management | 1 |

Domain 2: Efficiency

| | |
|------------------------------|---|
| 2.1 Simplify the pathway | 5 |
| 2.2 Productivity – hospital | 5 |
| 2.3 Productivity – community | 5 |
| 2.4 Measurement | 5 |

Domain 3: Patient and staff

| | |
|----------------------------------|---|
| 3.1 Patient experience | 4 |
| 3.2 Patient outcomes | 5 |
| 3.3 Risk of harm – patients | 5 |
| 3.4 Risk of harm – staff | 3 |
| 3.5 Reducing health inequalities | 5 |

Domain 4: Supply chain

| | |
|-----------------------|---|
| 4.1 Circular economy | 1 |
| 4.2 Obsolescence | 1 |
| 4.3. Interoperability | 1 |
| 4.4 Risk | 2 |

Domain 5: Purpose

| | |
|-------------------------------|---|
| 5.1 Meeting the specification | 2 |
| 5.2 Ease of use | 2 |
| 5.3 Implementation support | 3 |
| 5.4 Aftercare support | 1 |

Whole life cost

| | |
|-----------------------|---|
| Whole life cost model | 4 |
|-----------------------|---|
